Subject: Western Region

Hi J

There are some quads in Arctic that border Western (and will be more in Interior) and we have not done a geodatabase for Western yet since the funding wasn't covered with the DOE stuff. We can leave that half of those maps blank for now or do the work to create the GDB for Western and edit those quads for anno placement. What do you think is the priority?

Also here are some map numbers and ballpark estimates for completing the regions:

Southeast (248 maps - 70 updates)	1.5 months
Southcentral (308 maps - 111 updates)	1.5 months
Southwest (382 maps - 119 updates)	2 months

Western (272 maps)	2.5 months
--------------------	------------

Interior (501 maps)
Arctic (371 maps)

The updates and Arctic and Interior will be done by 6/30. With other project commitments, completion of these maps will come after 6/30.
